Q1

True, sender doubles window size when all sent packets are acknowledged

Q2

False, Increases by one per RTT

Q3

True

Q4

False it resets window size

Q5

    A) Triple Duplicate ACK

Q6

 b) No

Q7

d) Time Out

Q8

    B) No

Q9

    B) Less

Q10

It uses an exponential increase over time as simply incrementing a value would cause a linear slope and over time it is much faster to discover the maximum load using exponential increases.

Q11

??? I don't know what the question is asking for. Is it set up for the next few?

Q12

c) 400ms

Q13

c) 1200 ms

Q14

b) 600ms

Q15

Multiple connections for causing cross traffic between the same router in a system
